SUMMARY

Web developer with 4+ years of experience building and maintaining Laravel applications in production. Built and maintain a centralized ticketing hub connecting 12 internal apps and sites, authored a reusable OAuth2 login package adopted across 8 of them, and have kept a field-sales platform running and growing for 4 years across 490+ released updates.

WORK EXPERIENCE

Web Developer

April 2022 — Present

BEVI (Beauty Elements Ventures Inc.)

- Built and maintain BEVI Hub, a centralized Laravel application providing an automated, priority-routed ticketing system used across 12 internal apps and sites, with single sign-on for 8 of them.
- Authored and published **hub-auth-client**, a reusable OAuth2 SSO Composer package supporting Laravel 8 through 12, replacing custom login integrations across 8 connected apps.
- Integrated AI features (OpenAI, Google Gemini, Laravel AI SDK) for document parsing, knowledge-base search, and automated reporting.
- Maintain the company's Sales Management System, the primary platform for field sales orders, visit planning, and reporting — in active production for 4 years across 490+ released updates.
- Work with real-time broadcasting (Laravel Reverb/Echo), Livewire, Tailwind CSS, and Three.js to build internal tools with live updates and modern interfaces.

Web Developer

2019 — 2021

SocialConz Digital

- Developed and maintained web applications using PHP, Laravel, and MySQL.
- Collaborated within a small team to deliver client projects end-to-end, from database design through deployment.

TECHNICAL SKILLS

Languages & Frameworks	PHP, Laravel (8–12), Livewire, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap
Backend & Data	MySQL, RESTful APIs, OAuth2 (Passport, Socialite), Composer package development, Spatie Permissions
Real-time & AI	Laravel Reverb/Echo, OpenAI, Google Gemini, Laravel AI SDK, Three.js
Tools	Git/GitHub, cPanel, DomPDF, Excel/PDF exports
Other	Basic computer troubleshooting and formatting, basic photo editing

KEY PROJECTS

BEVI Hub — Centralized ticketing platform connecting 12 internal apps and sites (8 with single sign-on), with real-time updates and idempotent multi-app sync.

hub-auth-client — Published, reusable OAuth2 SSO package for Laravel 8–12. github.com/bevi-webdev-jm/hub-auth-client

Sales Management System — Field sales order, visit-planning, and reporting platform; 4 years in production, 490+ released updates.

One Portal (STO Online) — Configurable sales-data import system that validates each client's file against customer, product, and pricing records and flags mismatches before they reach the database, with AI-generated trend dashboards and summaries on top.

RAG-AI Knowledge Assistant — Knowledge base and chat assistant that searches the company's own documents (via embeddings) to answer questions, with a self-service admin screen non-technical staff use to keep the content current.

Online Auction Platform — Internal bidding app with QR-coded items, live bid updates, and automatic Excel/PDF reporting for buyers and admins after each auction.

Minutes of Meeting (MOM) — Meeting and action-item tracker separating attendees from owners, with targeted notifications, automatic overdue flagging, and one-click PDF export.

Laravel 12 Starter Kit — Reusable internal starter kit (auth, roles/permissions, org chart, real-time notifications, activity logs) so new projects begin with the foundation already in place.

EDUCATION

BS in Information Technology, Major in Database Management System
Nueva Ecija University of Science and Technology

2015 — 2019

CERTIFICATIONS

Laravel 7 for Beginners — Practical Course, Udemy (Martin Eberth)
